

Care Free Copper & Bronze Finishes

Nothing is care free, but our Copper Penny & Antique Bronze finishes are twice as hard as stainless steel & far more resilient to the natural elements that typically discolor a living finish.

Follow our maintenance & cleaning instructions & you should easily be able to maintain a rich uniform finish.

Just use nonabrasive cleaners or dish soap & a soft cloth to clean your sink. Though your sink is twice as hard as stainless steel a coat of ICE paste wax will help protect your sink from scuff marks. Don't use steel wool, abrasive cleaners, bleach, oven cleaners, vinegar, alcohol or metal implements to scrub your sink.

Finishes will vary in color & will be made as close to the provided samples as possible. **If slight variances in color tone are unacceptable we recommend a living finish sink.**
